DETAILED ACTION

Response to Amendment

1. The reply filed on 4-01-03 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): The Office Action mailed 1-29-03 stated that "Applicant is advised that the reply to this requirement to be complete must include an election of an invention according to inventions I-II, and an election of an invention according to SEQ ID NO: 1-29, to be examined even though the requirement be traversed (37 CFR 1.143)." Applicants elected group I, and SEQ ID NO: 16, however newly amended independent claim 1 (claims 2-6 and 9-11 depend from claim 1) currently recites a nucleic acid sequence (specifically, 3'-CAAUCCCAAUC-5') that was not recited in the claims as originally filed. Therefore, it is concluded that the amendment to claim 1 filed 4-01-03 results in an invention that was not included in the originally presented invention, because the original claims were not limited to an antisense sequence 3'-CAAUCCCAAUC-5,' the original claims recited the nucleotide sequences according to SEQ ID NO: 1-29. The newly added sequence would require an additional sequence search beyond that required for searching elected nucleotide sequence SEQ ID NO: 16.

2. It is also noted that Applicants do not provide any express support in the specification as filed for the addition of this sequence into claim 1, as per MPEP 714.02 and § 2163.06, "[A]pplicant should show support in the original disclosure for the new or amended claims." Additionally, "[A]pplicant should * * * specifically point out the support for any amendments made to the disclosure," see also MPEP § 2163.

3. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice,

whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Sequence Information

4. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Claim 1 has been amended to recite a nucleotide sequence that has a length of greater than 10 nucleobases, and therefore should be included in the Sequence Listing.

5. A complete response to this Office Action requires that Applicants comply with the sequence rules, and that pending rejections be addressed. Any response that does not address all of these issues will be held as non-responsive. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.
